

MANAGEMENT POLICY

VISION GRID ENERGY (hereinafter VGE), a company dedicated to the design and development of engineering projects in the field of renewable energies, aware of the importance of service quality and respect for the environment in the development of its activity, has implemented in its organization a Management System that meets the requirements established by the international standards ISO 9001 for Quality Management and ISO 14001 for Environmental Management. In the maintenance and development of its management system, the company acquires the following commitments:

- To contribute with our projects to the objectives and challenges of society with respect to sustainability and the fight against climate change.
- Use and promote the best and most innovative techniques available, providing added value through the design of efficient and innovative technologies.
- Fulfillment of the requirements established and communicated by the client for the provision of services, anticipating, to the extent of our possibilities, their needs and expectations to achieve maximum satisfaction.
- Promote the establishment of a lasting relationship with our customers, which allows their loyalty, based on security and mutual trust.
- To maintain our infrastructures and equipment in optimal conditions in order to achieve maximum performance, efficiency and precision, and the minimum possible environmental impact.
- Comply with current and applicable legislation, as well as with all those standards or agreements to which the organization subscribes.
- Continuously monitor our suppliers of products and services in order to ensure the highest quality and minimum environmental impact associated with our activities and the work performed on our behalf.
- Continuously improve our integrated management system, service delivery, and environmental performance. Each year, in accordance with this policy, specific objectives are established, whose monitoring and achievement allow us to assess the effectiveness of the Management System.

This Management System is defined and developed in the Management Manual and in the documents that emanate from its application, being of obligatory knowledge and compliance for all company personnel in the development of their activities.
